Title : METHOD FOR SIMULATING DRILLING OF ROLLER CONE BITS AND ITS
APPLICATION TO ROLLER CONE BIT DESIGN AND PERFORMANCE

Assistant Commissioner for Patents
Washington, DC 20231

RECEIVED

MAR 13 2002

Technology Center 2100

Dear Sir:

In response to the Office Action dated August 9, 2001, please amend the application as follows and consider the included remarks.

IN THE CLAIMS:

Please amend the claims as indicated below. A marked up copy of the claims showing insertions and deletions is attached as an appendix hereto.

1. (Amended) A method for determining an axial force acting on each one of a plurality of roller cones on a roller cone drill bit during drilling, comprising:
simulating drilling of an earth formation by the roller cone bit, the simulating comprising calculating, from a geometry of cutting elements on each of the roller cones and at least one characteristic of an earth formation being drilled by the drill bit, an axial force acting on each of the cutting elements;
simulating incrementally rotating the bit and recalculating the axial forces acting on each of the cutting elements;
repeating the simulating the incrementally rotating and recalculating for a selected number of incremental rotations; and
combining the axial force acting on the cutting elements on each one of the roller cones to determine the axial force acting on each of the roller cones.
